

Lido Operations Center

Lido Briefing

Lido Briefing creates value

- Reduces costs and briefing time
- Offers complete route tailored briefing information
- Increases flight safety due to latest weather status
- Saves transmission costs due to Internet distribution
- Increases high briefing quality due to briefing standardization

The concept

Every pilot wishes to have a consistent and structured briefing package, enhanced with high quality graphics and supporting information. Dispatchers prefer a simpler and less hectic process for preparing briefing packages. Lido Briefing achieves both at the same time.

Lido Briefing provides you with the convenience and security of being able to generate and retrieve individually created

briefing packages from anywhere, at any time. All you need is a PC or notebook and a web browser. Log on and generate your tailored briefing package.

Operational and ATS flight plans, graphical and textual weather information, satellite images and NOTAMs can be accessed by your flight crews. Additionally, Lido Briefing offers you the functionality to select alternatives, to calculate block fuels as well as to place fueling orders.

Features and functions

- Lido Briefing allows you to generate individual briefing documentation for each flight event covering the following contents:
 - Operational Flight Plan (OFF) and filed ATS Flight Plan for relevant flight
 - NOTAMs and Company NOTAMs for planned route
 - latest available airport weather and SIGMETs
 - package of significant weather charts and satellite images for the relevant flight
- individual selection of NOTAMs and airport weather, such as METARs and TAFs for any additional airport
- graphical display of route and respective vertical profile, wind, temperature (UAD) and icing risk areas, based on filed route
- graphical display of ETOPS information for suitable and adequate airports (ETOPS circles, points of equal time, entry and exit points)
- Lido Briefing assists you in selecting an OFF for a particular alternate airport.
- Lido Briefing offers additional fuel ordering and tracking tools allowing you to order additional fuel, according to flight specific weight limitations as well as to generate and download fueling reports.
- Lido Briefing provides you with a self-briefing capability via an easy to use and intuitive user interface, configurable by customer administration.
- Lido Briefing retrieves and supports flight plans generated from the Lido Operations Center (Lido OC) flight planning system.
- Lido Briefing is a secure web-based solution with the option to place required Internet or intranet links for the flight crew.
- Lido Briefing includes a feedback loop to the flight planning system Lido OC to indicate the briefing status to the dispatcher.
