

## Data Center Solutions

### Enterprise Server Hosting

These days many business processes in companies are very closely linked to the IT infrastructure. In order for a business process to function smoothly and efficiently all IT-supported sub-processes have to be optimized. The interplay of complex business processes and the way these are reflected in the infrastructure requires a high degree of IT know-how. This is both a prerequisite and the basis for the reliable operation of stable and performant systems.

Lufthansa Systems has many years of experience in this field. We operate complex systems and system assemblies of all kinds on behalf of our customers.

As a full-range IT service provider we can offer you a holistic and innovative performance portfolio that is geared primarily to the value-added chain of the customer environment concerned. The Enterprise Server Hosting products represent a part of this holistic portfolio. The services provided include the provision and operation of hardware and software, network access, the operation of databases and, where required, application basis management.

With the high-availability Enterprise Server Hosting products, adapted individually to your requirements, you create competitive advantages in terms of both quality and

costs. Our Enterprise Server Hosting services provide optimal support for your business processes.

We can offer you a high-quality and at the same time cost-effective IT infrastructure. Together we can find the answers to these questions:

- How can your company's IT be geared optimally to the requirements of your core business?
- How can the service levels required by your customers or departments be catered for in your IT infrastructure?
- What are the core competencies of your company?
- Who looks after your company's IT needs?
- How quickly can you adapt your requirements to IT?
- How high is the actual cost (TCO) of your server operation, in particular with regard to its effects on future innovation issues?
- How do you ensure that your sensitive data are stored securely yet still remain available?

With Enterprise Server Hosting, Lufthansa Systems offers you secure, reliable and cost-effective operations on the basis of state-of-the-art technologies.
