

klm_general_july_05

On behalf of KLM, herewith our comment to the proposed changes.

KLM can accept C1/16 - Country of issue and nationality to be 3 letter document type codes.

KLM can accept C/25 - PSI TKNE format standardization for infant passengers associated to an adult PPD

KLM does not accept C/15 To allow R/Replace for segment UAP.

We prefer to keep already excising API information in the passenger record.

Replace holds the risk that a replace with 'nothing' means deletion of excising data.

Best regards,
Leonie
